ABOUT US

Our initiative begins by wanting to see more confidence and transparency in business, in GM Holding we analyze the current problems related to liquidity and confidence in large projects.

For this we want to join the encrypted technology of the block chain to all the processes that require it.

PURPOSE

GM Holding is a Startup working in these fields:

Research and development of new technologies in block chain and internet.

Support and accompaniment of entrepreneurs and companies in their transition to the digital world.

Private capital for the mining sector

MISSION

The objective of GM HOLDING is to be a collective that civilizes certain areas of the country, like in Colombia and other Latin American countries and the world, helping to build a more updated life, making people aware of the digital world. and participating in the digital transition of the world and business. allowing new generations to use safer tools and digital assets.

GM HOLDING aims to be the greatest ally in technological and financial leverage of farmers, students, entrepreneurs, businessmen, investors, institutions, independents, miners, producers etc.

VISION

In the next 7 years of technological transition, we will become the safest means of protecting intellectual property and creations throughout Latin America. Providing a more robust, a safer and more responsible mining practice and secure technology and more dynamic applications for users. Becoming the largest employers in the chain of design and development of software that can support the other companies allied to the holding.

OPERATION

Our operation system is carried out by means of a cryptographic token, which was designed solely to serve as a project leverage and financial instrument.

Through a private sale of the token, we will obtain the necessary resources to start our operational activity

BUSINESS CASE

Our business model is fragmented into several operations

- Acquisition of participation in mining titles
- Private sale of the GM token.
- Capital raising to carry out the first stage of exploitation.
- Exploitation of mining titles
- Purchase, sale and export of minerals
- Token volume, capitalization and liquidity

Support

We have a strategy to give GMcoin real support:

Operation

Mineral extraction (gold and emeralds)

About the mining titles GI6-121 and ICS-09431

Consultable in Colombian Mining Cadastre

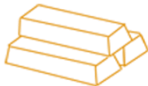

blockchain certification by lot

Support

The GM digital asset will be backed up

100% for Colombian minerals and intelligent contracts based on mining reserves.

- **Exchange**

- The assets of the holding company
- will be included in the main exchange platforms
- this way people can easily and safely exchange to other currencies

-

- **Marketing**

- part of the extraction will be sold through the GoodMarket store
- another part of the extraction will be put into shelter
- to give support and value to the token

GM HOLDING SHARES

GM HOLDING's corporate shares are tokenized in blockchain and are found under the acronym "GM" this type of shares have several differences to the traditional corporate shares.

Traditional Shares

- They cannot be interchangeable
- Cannot be split up
- Can't negotiate
- They are linked to the value of the company and the sovereignty of the company.

The Tokenized Shares

- They can be exchanged
- They can be divided into 100 million parts
- You can negotiate
- You can trade
- They are linked to the value of the company, they are not linked to corporate sovereignty

GMcoin

GMcoin is a token created under the Waves-NG protocol, through the Waves Platform.

Each token represents a corporate Action of the first Latin American company that decides to tokenize its GM HOLDING Shares.

This type of shares can be redeemed, exchanged, negotiated, fractionated and works as a digital currency.

These types of Shares cannot be modified, corrupted, duplicated, or falsified.

The exchange, sale or negotiation can be done through international exchange houses called exchanges, the shipping value is relatively cheap and around \$ 10 Colombian pesos.

The storage of the token and security is due to an international wallet where we can store BITCOIN, GM, ETH, and most digital currencies. Through this wallet we can bank, send, receive, and make payments under QR code or account number.

EXCHANGE

GM Shares are hosted in 2 international exchange houses and will soon be listed in other exchange houses. and can be exchanged for cryptocurrencies such as Bitcoin, Ethereum, and others.

The initial value of each share is \$ 3 Colombian pesos and have been issued 100 million shares, this value was the initial in the trading platform crex24.com, and its value is subject to purchase and sale orders within the platform, its value increases when more people buy the shares.

The logo for 'waves' features the word in a bold, black, sans-serif font. To the right of the text is a small blue diamond icon.

GMlabs

GMlabs entrepreneurship center of GM Holding

Our intention at GM LABS is to be able to research and develop possible technological and biotechnological advances, creating alliances with universities and laboratories that use any scientific practice that allows us to carry out environmental, ecological, social, cultural and economic evolution through technological knowledge.

Through GMlabs we want to offer a certified education system in blockchain, for children, young people and Professionals, making an alliance with institutions and schools, to support education in trends and technology.

Gmhelp

We have a program directed especially to the social part, help to the neighbor and preservation of species, an alliance has been created with the foundation Libelula Rosada of Uribía Guajira, Colombia

Our intention is to share 10% of the profits of the applications and financial activities that GM Holding has.

Our purpose begins in the north of the country in the Guajira, where the indigenous communities need education and technology to help them cultivate and have their productive activities in a more practical way.

Through good strategies the indigenous communities of the country could become self-sufficient, cultivating and producing their own food and that is precisely what GMhelp wants to achieve.

CONCLUSION

Every day we see how projects, ideas, and dreams that could have been very productive disappear, this is due to the lack of resources and accompaniment to keep a venture alive.

GM holding is a Startup that uses internet protocols that allow to store, share, send, receive and transfer private information in a safe and encrypted way.

We are a Colombian company that integrates entrepreneurs, developers, designers and businessmen to increase the collaborative digital economy through a more secure internet. helping to leverage and commercial expansion of Latin companies.

GoodMarket Holding Technology

GM Holding will continue its path to development
and innovation.
creating confidence in the internet.
